

ESSA AL-GHURAIR

Essa Al Ghurair is a business conglomerate with investments and production across three lines of business – Edible oil production and distribution, Karam Coffee production, Maize flour production and distribution. EGI continues to grow with its current engagements.

Business Challenge

Essa Al-Ghurair Investments needed an end to end integration across three different verticals – flour, edible oil and coffee - syndicate production costing, track wastage during production, and handle inventory. Their financial statements had to be generated in less time and payroll required processing at a faster pace. Top management sought transparency on goods being produced against the current demand. With limited transparency for administrators, the old system needed an update.

The Solution

SAP Business One ERP was adapted for Essa Al Ghurair Investments. It provides a complete integrated application across all the modules for their three verticals - streamlined Purchase, Inventory, Sales, Production, Payroll and Finance. A detailed User Acceptance testing followed by Go-Live support has enabled tracing of inventory by grade, including batch numbers for raw materials and FG (which are generated from SAP B1); for a better traceability and batch level costing. Manufacturing add-ons were deployed for tracking production, Quality, WIP and wastage. Mobile integration is also a part of the solution which is being used extensively. The new ERP system computes Production cost incorporating the overheads. Essa Al Ghurair Investments can now process payroll in less time and generate SIF file as well. The financial statements are now available on real time.

Indus Novateur is a recognized SAP Gold Partner in the Middle East, leading in consulting, technology and Application Management Solutions We help business transform and thrive in a changing world by co-creating breakthrough solutions that combine strategic insights and execution excellence.

- 250+ Customers Globally
- 350+ Consultants in ODC and R&D Centers.
- 17+ years' experience in implementing SAP products
- Branches across MENA and India
- Servicing across all cross functional solutions of SAP
